the current ecological crisis is a matter of urgent global concern with solutions being sought on many fronts in this book seyyed hossein nasr argues that the devastation of our world has been exacerbated if not actually caused by the reductionist view of nature that

has been advanced by modern secular science what is needed he believes is the recovery of the truth to which the great enduring religions all attest namely that nature is sacred nasr traces the historical process through which western civilization moved away from the idea of nature as sacred and embraced a world view which sees humans as alienated from nature and nature itself as a machine to be dominated and manipulated by humans his goal is to negate the totalitarian claims of modern science and to re open the way to the religious view of the order of nature developed over centuries in the cosmologies and sacred sciences of the great traditions each tradition nasr shows has a wealth of knowledge and experience concerning the order of nature the resuscitation of this knowledge he argues would allow religions all over the globe to enrich each other and cooperate to heal the wounds inflicted upon the earth

charts the multiple histories of american nature religion and explores the moral and spiritual responses the encounter with nature has provoked throughout american history traces the connections between movements and individuals includes figures from popular culture such as the hutchinson family singers and davy crockett as well as thomas jefferson ralph waldo emerson henry david thoreau and john muir

in the wake of both the semiotic and the psychoanalytic revolutions how is it possible to describe the object of religious worship in realist terms semioticians argue that each object is known only insofar as it gives birth to a series of signs and interpretants new signs from the psychoanalytic side religious beliefs are seen to belong to transference energies and projections that contaminate the religious object with all too human complexes in nature s religion distinguished theologian and philosopher robert s corrington weaves together the concept of infinite semiosis with that of the transference to show that the self does have access to something in nature that is intrinsically religious corrington argues that signs and our various transference fields can and do connect us with fully natural religious powers that are not of our own making thereby opening up a path past the western monotheisms to a capacious religion of nature with a foreword by robert c neville nature s religion is essential reading for philosophers of religion scholars of the psychology of religion and theologians
