john dryzek provides an accessible introduction to thinking about the environment by looking at the way people use language on environmental issues he analyses the main discourses from the last 30 years and those likely to be influential in future

taking stock of all the major developments in the field of international environmental law this text explores core assumptions and concepts basic analytical tools and key challenges

this book examines the discourse around the intricate economic political and ideological struggles underlying canadian fuel extractivism focusing on the two contending discourse coalitions formed by supporters and opponents of british columbia s liquefied natural gas lng industry the book explores the ongoing debates around the issue the book s in depth investigation of the bc lng controversy identifies progressive extractivism as an increasingly popular policy discursive paradigm adopted by fossil fuel advocates to legitimize unconventional fossil fuels in an era of intensifying climate crisis it also highlights the importance of debunking the misleading jobs versus the environment dichotomy in mobilizing public opposition to carbon intensive economic growth this deeply nuanced look at energy discourse in public policy will have resonance for scholars and students working in the areas of environmental communication rhetoric discourse analysis public policy and climate change rhetoric

environmental law text cases and materials offers a comprehensive critical and case focused approach to the subject combining insightful author commentary with carefully selected extracts to fully support students

environment and politics 4th edition is a concise introduction to this ever expanding interdisciplinary field explaining and illustrating how concepts conflicts movements political systems and the practices of policy making can be analysed in a systematic way this book provides a comprehensive overview of the key themes that shape the field and examines a diverse range of environmental problems and policy solutions found in different countries and cultures the new edition has been extensively revised to include up to date explanation of green political theories and traditions and the debates that shape action on the ground it contains an expanded discussion of environmental movements that work in the global north the global south and transnationally greater attention has been given to the roles of corporations non governmental organizations the media consumers and citizens in order to reflect the changing nature of environmental governance the text also focuses throughout on debates surrounding the concepts of environmental security environmental justice and environmental citizenship the authors examine the institutional responses of parliaments administrative legal and electoral systems the more informal politics of social movements and the politics of markets and the corporate sector as they respond to or resist the greening of societies this engaging text has been fully updated to offer readers a greater understanding of international national and local environmental politics as well as expected future developments at all levels environment and politics continues to use illustrative examples of conflicts people and events spanning north and south america europe asia africa and australia giving it global perspective and relevance each chapter includes questions for debate as well as a list of key words and resources for independent research this successful textbook remains a key resource for undergraduate and postgraduate studies across politics environmental studies development studies and human geography courses

this handbook addresses how chinese cities govern environmental changes generated by fast economic growth and urbanisation with in depth case studies on governing waste management climate change and energy transition it will illuminate the relationship between the state market and society in environmental governance

this book uses critical metaphor analysis to show from a cognitive perspective how climate change is conceptualized in the usa the author enriches his linguistic analysis with cognitive aspects such as source target domain mapping and metaphor opposition to explain how metaphor works in terms of framing this issue drawing on a critical discourse analysis informed framework to demonstrate how politicians represent the climate crisis in their attempts to trigger social change using a data set of speeches given by us based politicians governors and mayors speaking in the context of the withdrawal of the united states from the paris agreement the book categorizes metaphors on different conceptions such as war construction unfairness journey and cleanliness to bridge the gap between ecolinguistics and critical metaphor analysis this book will be of interest to students and scholars in fields including applied linguistics political communication ecolinguistics and cognitive linguistics and psychology

the failure of recent international negotiations to progress global action on climate change has shifted attention to the emergence of grassroots sustainability initiatives these civil society networks display the potential to implement social innovation and change processes from the bottom up recent scholarship has sought to theorise grassroots community based low carbon practices in terms of their sustainability transition potential however there are few empirical examples that demonstrate the factors for success of community based social innovations in achieving more widespread adoption outside of their local sustainability niche the book seeks to address two significant gaps related to grassroots climate action firstly the continuing dominance of the individualisation of responsibility for climate change action which presupposes that individuals hold both the ability and desire to shift their behaviours and lifestyle choices to align with a

low carbon future secondly the potential for community based collectives to influence mainstream climate change governance an area significantly under researched drawing on empirical research into australian climate action groups cags and related international research the book argues that grassroots community based collective action on climate change holds the key to broader social change this book will be of great interest to students and scholars of climate change citizen participation environmental sociology and sustainable development

this book provides a critical assessment of the new south wales land and environmental court nswlec effective adjudication has become a key consideration for environmental lawyers one of the most important questions is whether environmental law frameworks need their own courts with the conclusion being yes they do here a pioneer of such a court the nswlec is forensically examined to see what it might teach other such courts showing a court in action it suggests models that practitioners and policy makers might follow it also speaks to the environmental law scholars setting out a conceptual framework for studying such courts as legal institutions this multi faceted collection is invaluable to scholars and practitioners alike

the handbook of sustainability assessment introduces the theory and practice of sustainability assessment and showcases the state of the art research the aim is to provide inspiration and guidance to students academics and practitioners alike and to contribute to the enhancement of sustainability assessment practice worldwide it emphasises how traditional impact assessment practices can be enhanced to contribute to sustainable outcomes featuring original contributions from leading sustainability assessment researchers and practitioners it forms part of the research handbooks on impact assessment series

undergraduate level textbook explores environmental problems from the perspective of the social sciences and

humanities

an international journal of research in the public dimensions of science and technology

the politics of the earth provides an excellent and accessible introduction to thinking about the environment by looking at the way people use language on environmental issues john dryzek analyzes the various approaches which have dominated environmental issues over the last three decades and which are likely to be influential in the future these perspectives range from faith in unlimited economic growth to radical green politics the history interplay and impact of these perspectives are analyzed and assessed concluding with a plea for ecological democracy

explores ethical issues related to environmental conservation and sustainability discusses the moral responsibilities of individuals and societies

examines the works of frederick douglass booker t washington w e b du bois and several other canonical figures to uncover a rich and vital tradition of black environmental thought from the abolition movement through the harlem renaissance provides the first careful linkage of the early conservation movement to black history the first detailed description of black agrarianism and the first analysis of scientific racism as an environmental theory
